

HAMMERS & HATCHETS, FORGED IN ONE-PIECE

In 1923 Estwing produced their first hammer, whose header and handle were forged in one-piece. This construction is unbreakable when using under normal circumstances. It could not be exceeded during the last seventy years.

Each Estwing-hammer, forged in one-piece, and each Estwing-hatchet features brilliant steel grade, accurate curing, polished finish and a sophisticated balance and shape.

These tools are available with a luxurious leather handle or a non-slip and firmly bonded nylon-vinyl handle.

Especially comfortable and durable grips emphasise the quality of Estwing-hammers.

This year Estwing enlarged their range of products by the pointed roofing hammer.

Therewith the tilers' range of products which consists of roofing hammer, carpenters' and shingle hatchets, is widened with an often-demanded type of hammer.

Furthermore, Estwing modernised their hatchet- and knife combination. The popular hatchet is now combined with an improved knife, which is equal to the hardest challenge. The set is completed by two polished leather sheaths and is being delivered in a lovely gift box.
